The Generation Forest — Impact Starter Kit

Transforming Climate Action Through Regenerative Co-Ownership

Presented by Harsh Kyada

The Climate Challenge

A Stark Reality

Global temperatures continue to rise, with 2023 marking the warmest year on record.

Trust Deficit

Growing skepticism surrounds traditional carbon offset programs, demanding more authentic solutions.

Market Shift: New Imperatives

1

Regulation

Evolving frameworks like **CSRD** () mandate transparent reporting.

2

Reputation

Stakeholders demand demonstrable commitment to sustainability.

3

Stakeholder Pressure

Investors and consumers drive demand for verifiable impact.

4

Biodiversity

The **TNFD** () framework emphasizes nature-positive actions.

Core Research Insight

> Organizations are seeking credible, simple, and verifiable climate solutions that align with their values and offer tangible impact beyond mere compliance.

Our interviews reveal a clear demand for integrity and ease of integration in climate action strategies.

Made with GAMMA

Persona: Clara

Role

- ESG Lead at a mid-sized corporation
- Responsible for sustainability reporting & strategy

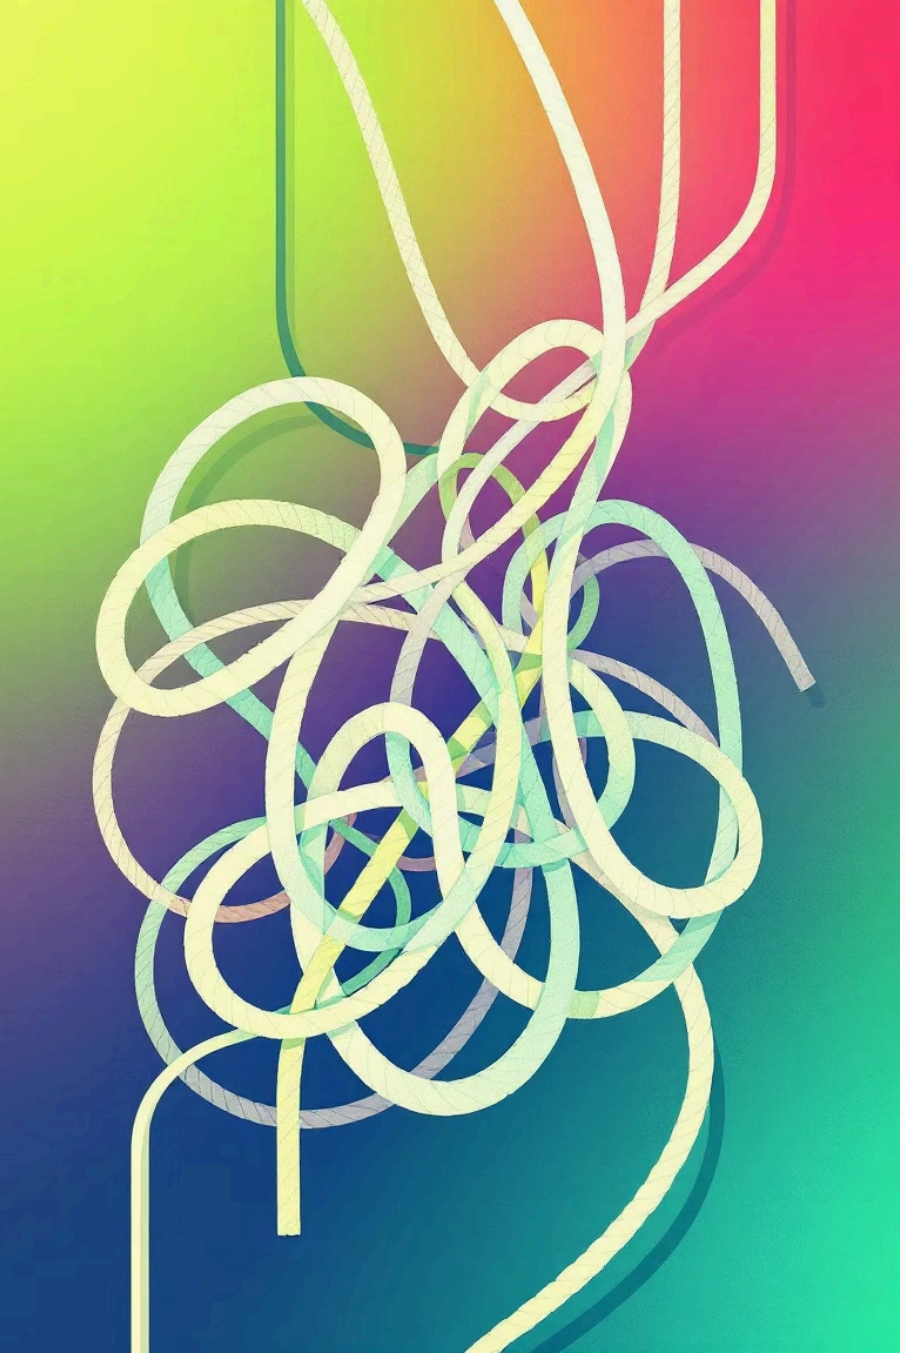

Needs

- Verifiable, long-term climate impact
- Clear, concise reporting for stakeholders
- Solutions beyond traditional offsets

Pain Points

- Complexity of current options
- Difficulty in justifying investments
- Lack of clear ROI on sustainability efforts

Made with GAMMA

The Problem Statement

Sustainability leads want a high-integrity, long-term climate solution beyond offsets — but current options feel complex, risky, and difficult to justify.

Made with GAMMA

Our Solution: The Impact Starter Kit

A streamlined pathway to genuine regenerative impact through co-ownership in biodiverse forest projects.

Made with GAMMA

What's Included

Impact Certificates

Verifiable proof of your investment in regeneration.

Reporting One-Pager

Concise, compelling data for your stakeholders.

Storytelling Toolkit

Assets to amplify your regenerative journey.

Made with GAMMA

Prototype Demo

Made with GAMMA

What User Testing Revealed

Clarity Needed

Confusion between donation vs. ownership structure.

Trust Signals Early

Demand for methodology and verification signals upfront.

Reporting Alignment

Reporting sheet valuable, but needed clearer CSRD/SBTi alignment.

Emotional Resonance

Strong positive response to certificates and storytelling elements.

Validation confirmed demand — but highlighted key clarity and trust gaps.

Made with GAMMA

How We Improved the Prototype

1

Before

- Messaging unclear
- Limited verification context
- Reporting lacked framework clarity

2

After

- Clear donation vs. ownership message added
- Verification micro-copy & methodology included
- Reporting aligned with CSRD, SBTi, TNFD
- Conversion step reworded to be supportive

These improvements increased clarity, trust, and conversion confidence.

Made with GAMMA

Go-To-Market Strategy

1

Target

European **SMEs** with rising compliance pressure and a genuine commitment to sustainability.

2

Channels

Targeted **LinkedIn campaigns**, engagement with sustainability communities, and direct outreach to ESG leads.

3

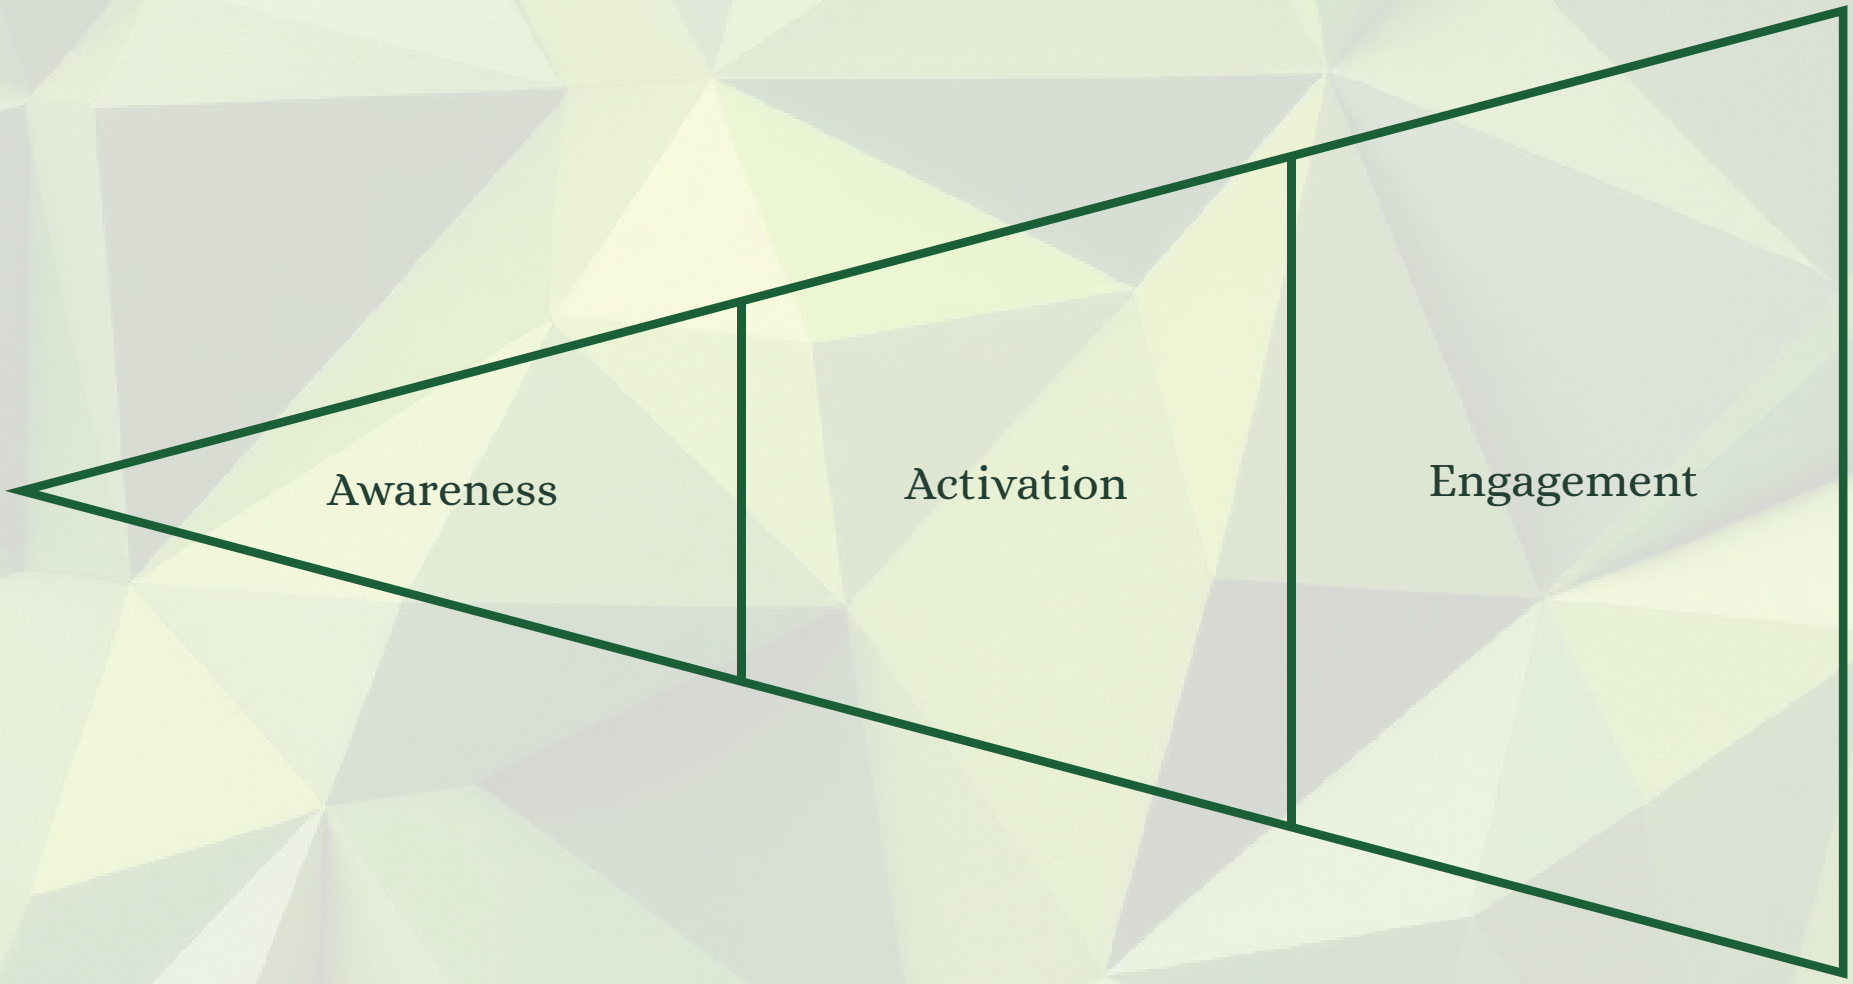

Social Proof

Publicly share **impact certificates** and reporting examples to build trust and demonstrate verifiable results.

4

Strategy

Introduce with a **donation-based entry** for immediate impact, progressing to long-term co-ownership models.

Simple entry + credible storytelling = pathway to long-term climate partnership.

Roadmap: From Activation to Stewardship

0–3 Months: Activate

Validate messaging and prototype activation

3–6 Months: Refine

Standardize onboarding and reporting

6–12 Months: Scale

Scale through partnerships and case examples

Year 1–2: Transform

Transition companies from donation to forest co-ownership

We grow forests — and relationships — for generations.
